## ➤ INTRODUCTION:

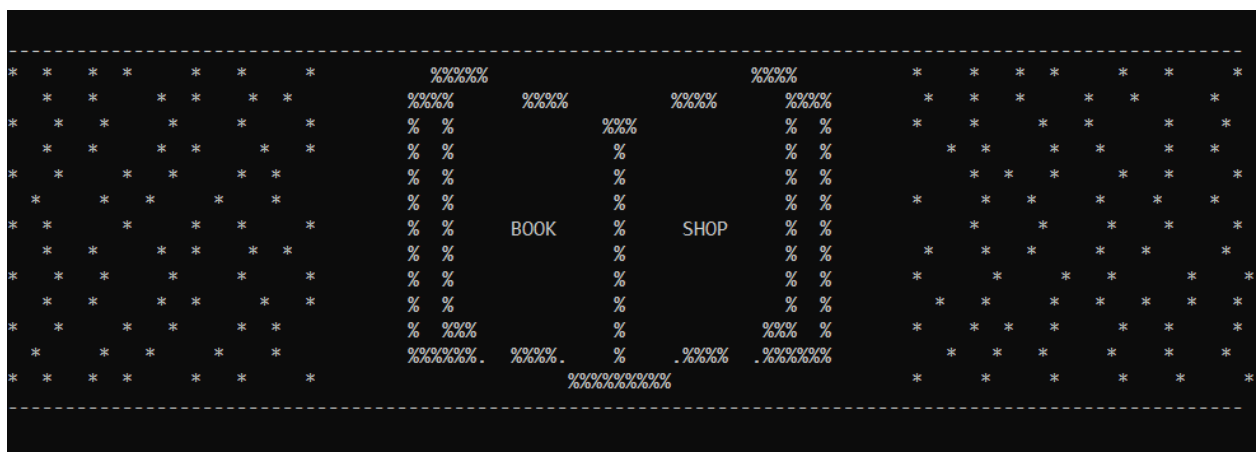

The project is on the **ONLINE BOOK SHOP MANAGEMENT SYSTEM**. The presenters of the project are:

- **MUHAMMAD SARIM**                      **SP22-BSE-040**
- **KHOLA GOHAR**                      **SP22-BSE-022.**
- **MUHAMMAD NOMAN**              **SP22-BSE-037**

Following are features of the project:

- Admin login.
- Costumer login.
- Book records.
- Sales records.

This application mainly helps in **keeping the record** of the books and makes the sales of the books easier. This is a user friendly and admin friendly application. All the books are **found under one roof** and thus can be bought easily. The owner will be able to update, view and change the data.

## ➤ MAIN FEATURES:

- To access an application, An Admin or Customer must first authenticate into our system using their username and password. The user is denied access when a login attempt fails. They serve as a security mechanism to guard against unauthorized access to sensitive information.
- Online Book Shop is used when someone wants to buy a book online from the shop. He can add books to his cart and buy them if he wants to buy them.
- Another feature of add book in cart is that after a customer has add a book once in cart, the program will prevent him from adding it again in cart.

- The automatic generation of registration numbers is another characteristic that attracts attention. Any entity will automatically receive a registration number from the system, which will also check to make sure it hasn't already been used by another party. If this is the case, the application won't stop until a unique registration number is generated.
- The Customer or admin can navigate to the previous menu / main menu whenever he wants.
- Admin sale a book himself to any customer in the shop.

### ➤ **SCOPE OF THE PROJECT:**

It helps in collecting perfect management details in a very short time for **obvious, simple, and easy collection. It reduces the cost of collecting the management** and reduces the cost of collecting management.

Our project aims at business process automation i.e., we have tried to computerize various processes of book shop management system. they are as follows:

- Forms can be **easily generated** and there is no need to do work manually.
- System **generates type of information** that can be used for various purposes.
- Satisfies **the user requirements.**
- It's **easy to operate.**
- **Easy to understand** by user and operator.
- **Encrypted id and password** for both admin and customer

### ➤ **TASK DISTRIBUTION:**

Khola Gohar	Books
M. Noman	Customer
M. Sarim	Sales and Cart

### ➤ **CONCEPTS INTRODUCED:**

Following are the concepts involved in this project:

- **File handling.** (Storing of data at the backend.)
- **Exception handling.**
- **Arrays.** (Deleting, updating of data, getting inputs and outputs.)
- **Conditional statements.**
- **Loops.**
- **Recursion.**
- **Methods**

### ➤ SIGN-IN DETAILS:

Every member using this book shop management system has its own login. it includes login as a:

- **Book shop admin login.**
- **Costumer login.**

To login correctly you must go through the following steps:

- As a customer, enter the **correct password and login id** provided by the admin.
- As an admin enter **the correct password and username**

After you have successfully signed into your account you reach the main menu.

```

*****
*****
****                               ****
****                               ****

****                               ****
****                               ****
*****
*****

1-Admin Sign in.
2-Customer Sign in.
3-Customer Sign up.
4-Exit application.

Choose your option:

```

### ➤ SIGN-UP DETAILS FOR THE CUSTOMER:

If we have a new costumer who has no previous account, he must go through the process off signing in by:

- The customer is provided with the **password** that is emailed by the admin.
- **User id** is generated randomly. A unique number that is always generated and checked thoroughly that weather is it unique or not.

Customer can sign up by providing the following information:

- **Name** of the customer in the form of a string.
- **Gender** of the customer by selecting the relevant point.
- Providing the **phone number if the form of (0000-0000000)**. Any number entered other than pattern will not be considered, and the customer is asked to enter phone number again.

- Valid **email ID** of the customer.
- **Address of the customer** with complete information of the house number,

```

*****
-----ADD Your details-----
*****
Your reg id no. is: 268
Enter your name:
Noman
Enter your gender:
Options:-
1.MALE
2.FEMALE
3.OTHER
Choose option:
1
Enter your phone number(0000-0000000):
0305-6868085
Enter your Gmail Id(Must be correct):
creatify60@gmail.com

Enter your address:-
Enter House Number:
34
Enter Street Number:
2
Enter your sector:
G
Enter Town/Area name:
Faisal Town
Enter City name:
Islamabad

Your UserID is 268 and you will get your password on your email within 5 minutes.

```

NOW THE CUSTOMER IS SUCCESSFULLY ADDED TO THE LIST OF THE CUSTOMERS.

### ➤ MAIN MENU:

Main menu handles all **the files and generate them**. It also handles **the login application** that consists of 4 options:

- **Admin sign in.**
- **Customer sign in.**
- **Customers sign up.**
- **Termination of the program.**

```

```

## ADDITION OF THE BOOK:

Book can be added by the following procedure:

- Enter the **book id** of your own choice. If the book id already exists it prints the message that it is already present and asks to reenter a unique value.
- Enter **the book's name and author's name**. If an integer value or any other value other than string is written it asks the user to write the value again.
- **Book type** is entered by the user.
- **Published date is entered in form of (MM/DD/YYYY)**. If entered other than this, it asks the user to enter date again.
- **Price and quantity** of books is asked.

## **NOW THE BOOK HAS SUCCESSFULLY ADDED TO THE BOOK SHOP.**

If you want to add more books it can be done by **pressing "y" or "Y"**.

```

*ADD BOOK RECORD*

Enter book id:
126
Enter book name:
Charlie
Enter author's name:
Chaplin

Book type:-
1-Informational(Study)  2-Adventure story      3-Novel
4-Crime book           5-Children story    6-Science friction
7-Historical story     8-Horror story      9-Mystery story
10-Poetry book         11-Someone biography 12-Other
Choose book type:
9

Enter the Date (MM/DD/YYYY):
02/11/2021
Enter book price:
7000
Enter book quantity:
3
Book with id 126 was added succesfully.

Want to add more Book records? (Y/n)

```

### VIEW BOOK:

Added books can be viewed by selecting the option **“VIEW BOOK.”**

```
